Corrected: removed John Power 19 692-693 plant parts can suffice I guess? Corrected	John Power	18	656		Reference - low livestock predation.	Surplus killing ref aded
John Power19678still quite/ vs highly selective, as previous states them to be non-Corrected; changed to 'adaptable' asJohn Power19681various degrees/ extent ??Corrected: removedJohn Power19692-693plant parts can suffice I guess?Corrected						
John Power 19 692-693 plant parts can suffice I guess? Corrected	John Power	19	678		still quite/ vs highly selective, as previous states them to be non-	Corrected; changed to 'adaptable' as

John Power	20	704		Some Brand references for here/ this?	Not corrected
John Power		711		Butler's	Corrected
John Power		717		baboons = their??	Corrected: This sentence is removed.
John Power	20	726		[square brackets] ?	Not changed. Correct as is.
John Power	20	736		path length = movements/ daily movements??	Not changed. Path length is daily
John Power	21	749		Chapter number?	Corrected. Added (see also Box 2,
John Power	21	756		, even lethal management can remove specific individuals.	No corrected - keep sentence as is.
John Power	General				We are not sure how this is relevant?
John Power	General			Absent species in species account - a notable species not	K Marnewick (co-author and Cheetah
John Power	General			Other species accounts - not to mention too many, but perhaps	Predation by these so rare and no peer-
John Power	22	792-794			We acknowledge the comment; but we
John Power	22	800		main determinant	Corrected to main
John Power	22	809		but= and?	Corrected to: There are limited density
John Power	23	817		basic biological knowledge	Corrected; Basic biological and
John Power	23	819-822		not a next point ? 6.	Corrected, added a new point. 6 But
John Power	28	1028		Canidae?	Corrected along with "Carnivora"
John Power	33	1176		on private land	Corrected
John Power	33	1209		nonlethal?	this is correct - taken like this from MS
John Power	38	1338-1339	Table 9.1	Species - must perhaps mention of juveniles - ie. calves, kids,	Added juveniles, added Skinner 1976
John Power	41	1392	Table 9.2	Predator species - add Python and perhaps Genets?	No evidence genets take small livestock,
John Power	41	1392	Table 9.2	Group size - cheetahs - coalition sizes? Wild dog - 2 ? Minimums	Single wild dogs do occur. Cheetah size
John Power	41	1392	Table 9.2	Home-range sizes - am sure you can get a range of baboon home-	In order to keep short as previously
John Power	41	1392	Table 9.2	Density - can do better here ?? Leopard - 0.5 - 16?? Kalahari/	Corrected for leopard, serval and BH
John Power	General			Maybe some mention of NGOs that work with these species,	Not sure to include these. While majority
John Power	General				Other comments is that there is too
